

HANDLE•IT™ POST PROTECTORS

Features and Benefits

- Handle-It™ Post Protectors help prevent damage to rack uprights, shelving uprights, partitions and many other factory and warehouse structures
- These heavy steel protectors provide a low cost method of reducing damage to expensive equipment and protecting personnel from falling rack structures hit by moving vehicles
- Handle-It™ Post Protectors wrap around the 3" column face vertical member to be protected, closely fitting, yet protecting, the upright from damage from collisions with forklifts or other moving vehicles
- These heavy duty ¼" thick steel protectors are easily mounted by securing to the concrete floor using four ½" diameter wedge anchors (supplied as optional purchase)
- A variety of standard heights are available (12", 18" & 24") with custom heights and openings also available on special order
- Handle-It™ Post Protectors are painted in safety yellow hard glossy finish for a durable attractive appearance

HANDLE•IT TRACK GUARDS

Features and Benefits

- Handle-It™ Track Guards help prevent damage to overhead door tracks more efficiently than conventional pipes imbedded into the concrete floor
- These steel protectors provide a low cost method of reducing damage to overhead door tracks hit by moving vehicles
- Handle-It™ Track Guards fasten to the floor and to the wall and wrap around the overhead door track on two sides, closely fitting yet protecting the track from damage from collisions with forklifts or other moving vehicles
- These heavy duty ¼" thick steel protectors are easily mounted by securing to the concrete floor using three ½" diameter wedge anchors (included) and to the wall using four wall anchors (not included)
- Handle-It™ Track Guards do not interfere with dock operation and eliminate dock downtime and expensive repairs to tracks
- 48" standard height is offered with custom heights also available on special order
- Handle-It™ Track Guards are painted in safety yellow hard glossy finish for a durable attractive appearance
