Approx. ship weight	3,899 lbs.
Power supply	480V, 3 phase
Consumption	4 kW
Operation voltage	24 V DC
Air supply	90 PSI
Control panel	10" Weintek HMI touch screen
PLC	Siemens S7-1200
Operator control	Siemens MTP700

ADVANCED FILM SEALING UNIT

LEVEL UP YOUR LOAD CONTAINMENT

The sealing unit clamps the film securely during the initial wrap. At the end of the cycle it ropes a thick band of film to the pallet, pulls the band safely away from the product, then cuts and heat-seals the film tail – with no risk of damaging the load. The result: solid product-to-pallet stability and a film tail that stays put.

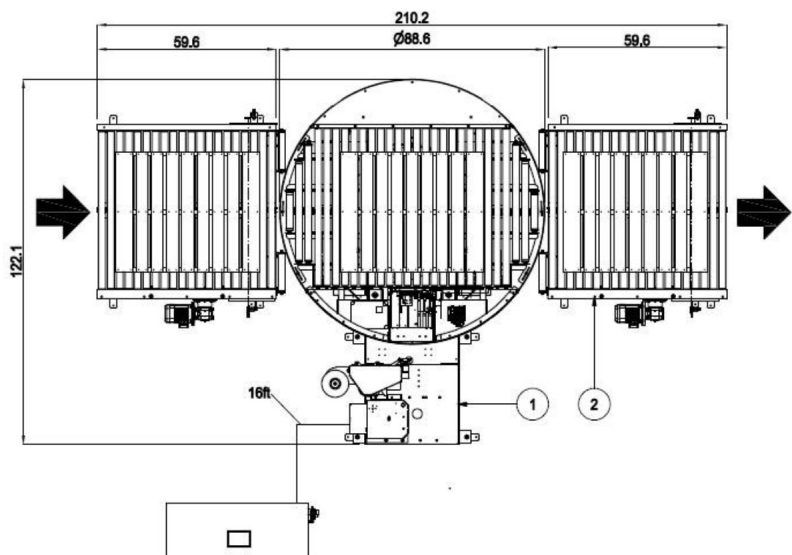

ROPING + HOT WELD SEALING: STANDARD, NOT AN ADD-ON

COMPACT FOOTPRINT

Designed to fit your floor. The HMI and electrical cabinet come with 16' of cable for installation flexibility.

210" × 122"
